

Kapex KS 120 Product Tour

FESTOOL

Bevel clamp

Lever type clamp for rapid and positive bevel angle locking.

Near total dust extraction

Minimizes hazardous dust for a safer work environment. Also helps you keep a clear view of the work piece and save time cleaning up.

FastFix

Saw blade system for rapid, convenient saw blade replacement.

Dual lasers

For simple, precise stock placement on cut line.

Easy tilt angle adjustment

Front rotary bevel control knob allows for precise angle adjustment with a twist of the knob.

Phenomenal cutting depth

The unique cutting position on the KAPEX allows you to cut stock up to 4-3/4" (120 mm) quickly, easily and accurately.

MiterFast included

Transfer interior and exterior angles precisely from the workpiece to your KAPEX. Conveniently stores in the base so it is always at hand.

Robust and stable

The KAPEX was designed for tough industrial application. The large magnesium base with rubber feet provides maximum stability.

Large, easy to read scales

Easy-to-read scales are abrasion-resistant for long life and are fully adjustable. 50° left and 60° right miter, and up to 47° dual bevel.
